

## BRECKENRIDGE NEWS.

WEDNESDAY, APRIL 4, 1915

## FALLS OF ROUGH.

Miss Flora Robertson is very ill with pneumonia fever.

Mrs. Willis Green went to Louisville Friday to buy a large stock of spring goods.

Mrs. David Moorman, of Glendale, was visiting her sister, Mrs. Frank Peyton last week.

Miss Jennie Green is home for the week from Princeton, Ky., where she has been attending school.

Charlie Stone went to Chicago a few weeks ago, where he has a good position with the Chicago City Railway Company.

Mrs. L. Green has been very ill for the past week, but we hope to feel her kind and gentle influence in the Sunday school again soon.

Meeting at the Methodist church first and third Sundays each month. Prayer meeting every Wednesday night and Sunday school at 10 a. m.

There has been a fine season for maple syrup and sugar and there have been a great many gallons and cents produced from the many fine orchards around.

Misses Maund Lyons and Ileen Brown will open their stock of dress goods and millinery next week, up at the new store of Mr. L. Green. They also cut and make dresses in the very latest styles.

A certain widower says that he loves all sweet music, but the glee, or the Bell, he loves best of all. The Bell is also his favorite flower. There surely is some cause for all this partiality for so common a thing as a Bell. I wonder what it is.

The Hunting and Fishing Lodge will soon be filled with visitors. It is a most pleasant resort for spring and summer. The scenery is very beautiful and hunting and fishing is good. The banks of the river are cool and inviting, while a row on the water is a never-to-be-forgotten pleasure.

The produce market of this place is over stocked and the prices, for that reason, are extremely low. The people have so much surplus that they keep the market over flowing, so why should we fear the constant cry of "hard times" we have so much more than we can consume.

The recent rise in the river was sufficient to get timber down from its upper course. Mr. Arthur Goodman says the timber came down and is ready to be loaded. A great deal of timber and lumber is shipped from this place and a great deal more is stacked on the ground. This is a busy little place and the people are honest and industrious.

Mr. Sam Morgan has his lead so badly turned and bedeviled with so much bad timing and all this pretty weather and we are waiting this that he thinks every word which begins with a J spells Jen and ends with a S, so he sits and scribbles Jen and wishes the fish would burst up and begin to bite so he could go fishing in the river as well as on dry land.

The weather is fine for all kinds of spring work and farmers and the people generally are making good use of it. It is all seem to be busy as bees. Plowing and sowing is the order of the day with the hope of reaping a bountiful harvest of fine hay. This hope inspires the sturdy farmer and his joyous song fills the valleys and reverberates from hill to hill with the murmuring of the gently flowing streams.

From another correspondent.

Mr. Willis Green is opening his new goods to-day.

Miss Quenouren is teaching a summer term at the school house.

Miss Maud Lyons has opened a beautiful line of millinery. She and Miss Brown, of Haverhill, are associated together. The latter brought all the latest styles and will make dresses in the last few days have brought out the fishermen. We hope the sailors will respect the law and let our fish increase in number this year, sufficient to tempt the visiting sportsmen who are always welcome.

Miss Jennie Green is at home from Princeton for a short vacation. Preston Green spent Saturday and Sunday. Mrs. Green killed the fat turkey in honor of their visit. It weighed fifty pounds. Any persons possessing or growing a turkey they had ever seen.

Seven o'clock Friday evening. At the present moment the hills around us are on fire, making heavy losses of fencing and the houses of Mr. Frank Wilson are in imminent danger of being burnt out. A high wind is blowing with no signs of abatement. Mr. Lank Pentecost left his house and furniture by fire to-day. These losses are especially to be deplored as this has been such a hard year for farmers.

Did You Ever?

My Electric Bitters as a remedy for your troubles? If not, get a bottle now and you will find it. This medicine has been found to be peculiarly adapted to the relief and cure of all Female Complaints, exerting a wonderful direct influence in giving strength and tone to the organs. If you have Loss of Appetite, Constipation, Headache, Fainting Spells, or are Nervous, Sleepless, Fatigued, Melancholy or troubled with Dyspepsia, Bile, or Biliousness, this medicine will cure you. Health and Strength are guaranteed by its use. Large bottles only fifty cents at A. S. Fisher's drug store.

The U. S. Gov't Reports show Royal Baking Powder superior to all others.

## PAYNESVILLE.

Health of the community very poor, weather good and visiting very common. Miss Jessie Brown and Mr. Jim Atter were the guests of Mrs. Anna Venter last Sunday.

Mr. and Mrs. John Kenick, of near Lexington, were visiting their parents last week.

We see the croquet grounds are opened up again and the men are enjoying themselves as well as ever.

All who attended church at the Baptist church Sunday were well pleased with their new pastor, Rev. Shacklett.

Mrs. Kate Herbin's choir is progressing nicely with a large attendance and good instructions, will no doubt be a success.

We learn that Dr. O'Brien will have an appointment, but it will not be for a while, as he is on his way to Louisville for "I'll tell you 'Doc' is a crowder."

Miss Anna King and brother, Gus, spent Saturday and Sunday with Misses Julia and Maggie Hardesty, of near Mt. Merion, and report a jolly time. We hear that Mr. Gus will soon take his departure for Louisville to go to work with the coal mine.

Jeff O'Brien availed himself of the farmers are busy burning plant beds sowing out and preparing for another long hard summer's toil, but it is something that is absolutely necessary and cannot be omitted on account of the dull prices allowed by you for your produce.

From another correspondent.

Joe Wiles has gone south.

Miss Frankie Conway is visiting in Louisville.

It. H. Smith has gone to "Hoochie" to sell fruit trees.

Two schools in town, Misses Ella Flaherty and Daisy Payne the teachers. Joe Flaherty is the only Cleveland Democrat in this community, poor Joe.

Chas. Venter and Jeff Thorndyke were the farm recently vacated by S. S. Miller.

Judging from the tone of most of the letters in the News of March 20th, our correspondents are enjoying "showers of blessing."

We learn through the News that Chas. Blanford and Dr. J. B. Frymire are both for the free coinage of silver. Will they (Dr. and Charlie) forget their past political differences and unite with the Silver party? or will they be like a land-lorded girl in a briar patch (very tender). The hope for silver lies not in the blind pursuit of party, but in the union of all its friends, regardless of past differences. The party spirit is too strong in many of us. It poisons the mind and prevents deliberate and impartial action on many of our most important measures. Any man wishing a public career must give allegiance to some party and stick to it regardless of principle. The masses of the people are led by their "bosses" in the spirit of the party, and the better the quality of the country are used only to agitate the voters, stir up their prejudice and make us "stick to the party." Politicians between each other and work for the feelings of the voter, until he is no more fit to cast his ballot, than an excited mob is of executing the law. We should carefully, calmly and earnestly study the questions that are being discussed and after a full consideration we find we are wrong, let us be honest enough to admit we were in the wrong and then go to work for the right and the betterment of our once glorious country.

Dr. Bell's Pine Tar Remedy is different from all other cough remedies. It cures by allaying the inflammation and giving tone, strength, vigor and vitality to the respiratory organs.

It is sold by Short & Haynes, Cloverport; Dr. R. H. McMillin, McDaniel's; Dr. Meyer & Co., Burns; Geo. Heyser, Conners; A. Taylor, Rosetta; Drury, Bennett & Co., Bevelyville, Ky.; W. E. Brown, Irvington, Ky.; J. A. P. Nichols, Gardfield, Ky.; A. R. Morris, Big Spring, Ky.

BIG SPRING.

Mr. James Moorman is still very low.

Miss Georgia Harrell was on the sick list last week.

James Wheatley, of Flaherty, was in our town last week.

Mrs. Emma Fayner has returned to her home in Vine Grove.

It seems like the chicken case has struck all of the families in this town.

Mr. McCorbue, of Irvington, was in our midst this week trying to sell a book on election.

G. A. Meador has a rooster that weighs 10 lbs. and is a last July chicken. How is that for a cock?

Taylor Norris went to Louisville with his tobacco last week, but haven't heard what prices he realized.

T. R. Moorman, our hog medicine man, has bought a pair of thoroughbred Potts China and Chester White hogs.

W. H. Doran has decided to build him a chicken place and will commence it shortly. He has thoroughbred Longhorns and Brown Langshires.

Our young men are getting to be a week and did a much needed improvement and that was making a good road to the spring. The old one was a disgrace to our community.

Rev. Wm. Jones, of the Baptist, Theological Seminary, called the pulpit at the Baptist church last Sunday and the subject of discourse in the evening was "From the season to the pulpit." There was good attendance.

W. Jones is trying to secure the contract for carrying the mail from Vine Grove here, and if he succeeds in getting it, he will win position to have the mail start from here instead of Vine Grove.

Mr. James Moorman is improving slowly.

Mr. Blund, of Leitchfield, was here last week.

James Kinchloe, of Harlanburg, was here last Sunday.

Dr. H. W. Shubley, of Shelbyville, Ky., was here to see Mr. James Moorman last week.

Mrs. C. C. Moorman and sister, Mary, Mrs. C. C. Moorman, visited relative here last week.

Mr. Seiger, representing Chamberlain Medical Company, of New Orleans, Iowa, visited our town last week.

Miss Clara Morris returned home last week from Harlanburg where she has been visiting for some time. Miss Elizabeth Fiskridge accompanied her.

Meade County Medical Society at Brandenburg last Thursday. R. S. Clarkson, Jr., accompanied him to Brandenburg.

Our better halves say they could not keep house without Chamberlain's Cough Remedy. It is used in more than half the homes in the county.

Since Bros. Leels, Louisville, this shows the esteem in which that remedy is held where it has been sold for years and is well known. Nothing has earned that there is nothing so good for colds and whooping cough as that remedy it cures these ailments quickly and permanently, and that is pleasant and safe for children to take. 25 and 50 cent bottles are sold by A. R. Fisher, Cloverport, Ky., and Kinchloe & Board, Harlanburg, Ky.

COL. W. O. BRADLEY.

A Beautiful Tribute to the Man by a Political Enemy.

From the Interior Journal.

The Louisville Critic, like the Interior Journal, has a very high regard for Col. W. O. Bradley personally, while having no love for his politics. Some people can not understand this and the Critic has been called to task for it. It is no response so fully covers our feelings with regard to the colony, that we partially appropriate it. Like the Critic we hope our paper has passed the test of the year when the mere fact that a man is a member of the opposite party will not hinder him from the role of decent treatment. The colony has the best of it when he has to make up a loveable man. He has talent, he has good nature, he has brightness, he has courage, he knows his business and he has a heart that has many qualities of nobility and heart that commend him to never ending considerations. He is the foremost republican in the South, one of his party's best leaders, a loyal, capable and noble antagonist. As a politician, who fights his battles in the open and asks no quarter, as a private citizen who loves his State and her people and as an individual, he knows what good fellowship means, with all the wit and wisdom and fine feeling that the term implies and Bradly is entitled to the fair treatment and the consideration we all wish accord him.

MARRIED.

Crossed Over the River Just For the Novelty of the Thing.

PHILIP, Ky., March 18th.—The monotony of our little village was broken on last Wednesday March 27, by the wedding of Mr. J. Frank Gilbert and Miss Johnnie Johnson. They were married in Cloverport, Ind., at 12 o'clock noon. It was quite a surprise to every one as all news of the wedding was kept from the eyes of the guests. There were no objections to the match on the part of the parents, and it was only for the novelty of the trip that they crossed over the river. Mr. William Bahr, of Owensboro, accompanied them and were also "best men" and bridesmaids. Miss Johnson was born in Brookridge county near Harlanburg, where she has a host of friends and relatives. While still in school in Philip one year, she can count her friends here by the score. Mr. Gilbert is a carpenter and always lived in this place. He is highly respected by all who know him. They are now in the city of Louisville, where they are both employed in the same firm. They are both very bright and are a great asset to the community.

## PREVENTION OF SMALL POX.

Suggestions by the State Board of Health.

BOWLING GREEN, Ky., March 29, 1915.—To the Health Officials, Physicians and People of Kentucky.

Although small pox has been more than usually prevalent in many sections of the Union for more than a year our State has escaped until very recently.

About four weeks ago the disease was brought from the Ohio race course, near Chicago, to Lexington, by a negro stable boy and twenty-five cases occurred there before it was gotten under control. A negro from Lexington carried it to Ashland, and a case was reported at Princeton yesterday. Errors of diagnosis with first cases at Lexington and Ashland, and the lack of an available isolation hospital at the first named place, helped to spread the disease and greatly increased both the trouble and expense.

In view of existing conditions the Board feels it to be its duty to warn the authorities and people that decide action should at once be taken to guard against this pestilence. Fortunately the method of prevention is as certain in its action as it is cheap and easy to obtain. Vaccination and revaccination, properly done, with reliable virus, is a certain preventive, and is entirely free from danger. This is the conclusion of the scientific world, after full investigation, and may be thoroughly relied upon.

Although it is a statutory offense to neglect vaccination, and ample authority is given to city councils and county courts to provide for the poor in this regard it is estimated that over one-third of the people of this State have never availed themselves of it. Intelligent persons should not wait for the law to enforce them to an evident duty, especially at the present time. Health and school boards everywhere should co-operate in requiring vaccination as a condition of admission to all schools, public and private, and managers of manufacturing and railroad should make the same requirement of their employees.

Vaccination is a simple and very important operation. It should always be done by a competent physician, under aseptic precautions, at three points on the arm, and the person should be kept under observation until the perfect result has been secured. Imperfect vaccination can only give rise to a false sense of security, and is the cause of the outbreaks in the management of small pox. Reliable virus may always be had from the National Vaccine Establishment at Washington, D. C., or from its agents.

The various health boards of the State, county and municipal, are requested to perfect their organization, and especially to provide suitable buildings for hospital purposes, so as to be ready to stamp out the disease if it should occur in their respective jurisdictions, by promptly and actively isolating the first case and vaccinating and revaccinating every person endangered by it. Physicians should bear in mind that it is often difficult to recognize the disease in negroes in its early stages, and experienced counsel should be called in by all doubtful cases where the patient has recently been in an infected locality. Physicians and heads of families should also remember that the law provides a severe penalty for failure or refusal to at once report the existence of the disease to the health authorities.

The Louisville organization and foresight makes the control and stamping out of small pox a simple matter in any community, and with proper management it need not interfere with business or travel.

Quarantine against persons and places dangerous thereby, are cruel and unnecessary, interfering with commerce and travel and giving little or no protection. Instead of this, the people at the present time, negroes especially, coming from infected districts, should be searched out, vaccinated, and kept under observation that they may be cured by safety to themselves and the community if taken sick. Their ministers and teachers, and the police authorities should be asked to assist in this.

We hold ourselves ready to assist the local boards to the full extent of our power in this and all other matters pertaining to the public health. Under our plan of the Board, or a physician who has had experience in the diagnosis and management of small pox, will be sent promptly to any county upon official request. We ask to be kept fully advised by wire of the appearance of first cases and of the progress of the disease.

By order of the Board.

J. M. MATTHEWS, M. D., President.

J. N. MCCORMACK, M. D., Secretary.

Every person, big, little, old or young, black or white, rich or poor, able to ever read, or not, should have a long remedy on earth. It's true, too, so we guarantee. For sale by Short & Haynes, Cloverport, Ky.; Dr. R. H. McMillin, McDaniel's; Dr. Meyer & Co., Burns; Geo. Heyser, Conners; A. Taylor, Rosetta; Drury, Bennett & Co., Bevelyville, Ky.; W. E. Brown, Irvington, Ky.; J. A. P. Nichols, Gardfield, Ky.; A. R. Morris, Big Spring, Ky.

The Silver Movement.

Augusta Chronicle: For a long time past the champions of the gold standard have sought to poison the mind of the people against the silver in the interest of "both gold and silver without discrimination against either metal," by declaring that the real friends of silver are not working for bimetalism, but for a silver standard. While this is only the prejudiced assertion of an enemy the friends of silver have been able to show that the gold standard champions have, by actual overt acts of legislation, done all in their power to discredit the white metal. The repeal of the Sherman act put a stop to further coinage of silver, and the effort to retire the greenbacks by an issue of \$500,000,000 of gold bonds would have left us absolutely on the gold basis, without even further pretense in behalf of bimetalism or paper money. It is quite clear that the real friends of the silver standard are the champions of gold, who choose to style themselves friends of "honest money." They are the ones who are ready to stand out the disease if it should occur in their respective jurisdictions, by promptly and actively isolating the first case and vaccinating and revaccinating every person endangered by it. Physicians should bear in mind that it is often difficult to recognize the disease in negroes in its early stages, and experienced counsel should be called in by all doubtful cases where the patient has recently been in an infected locality. Physicians and heads of families should also remember that the law provides a severe penalty for failure or refusal to at once report the existence of the disease to the health authorities.
